HIGH-BAY LIGHT 2.0

UNIVERSAL VOLTAGE 100-277

GENERAL DESCRIPTION

GUSCO Energy's GUFO high bay is a cost-effective option for a variety of both high and low bay applications. The specially designed aluminum housing is stylish and durable with excellent heat management. Integrated with Meanwell's latest low voltage constant current driver that's safe, energy efficient, and long lasting. The GUFO is IP65 rated and suitable for both indoor & outdoor applications, and is backed by a 5-year limited warranty.

STRUCTURE, MATERIALS & FEATURES

The GUFO has superior highly durable electrophoresis (E-Coat) paint finish. We take our metal light housing and immerse them in a water based solution that contains a paint emulsion. Then we apply voltage to the light housing causing the paint emulsion to condense into the housing. Then we cure the housing using a heat process. This process ensures the entire fixture is coated ensuring a long lasted finish. Passed a 200 hour salt spray test with no corrosion or paint damage.

The GUFO's optional indoor motion sensor is the perfect option to add additional energy savings and functionality. The motion sensor can be programmed for on/off cycles based on motion or IR, on to dim at preset level or dim based on available daylight (daylight harvesting).

APPLICATION

The GUFO can be used as a high or low bay and will work well in harsh environment. It's an excellent choice for areas that have high moisture like wash bays. The heavy duty construction and paint finish also make it a great choice for industrial applications.

HIGH-BAY LIGHT 2.0
UNIVERSAL VOLTAGE 100-277

PRODUCT INFORMATION

Model No.	Description	Rated Watts	Initial Lumens	Universal Line Voltage
G-HB-100V18	LED Round High-Bay	100	12152lm	100-277
G-HB-150V18	LED Round High-Bay	150	19926lm	100-277
G-HB-200V18	LED Round High-Bay	200	26168lm	100-277

STANDARD FEATURES

- 0-10V DIMMING
- DARK BRONZE
- IP65 RATED
- HIGHLY DURABLE ELECTROPHORESIS (E-COAT) PAINT FINISH
- AC 100-277v
- DLC & ETL LISTED

ORDERING INFORMATION

Model No.	Optics	Controls	Special Order
G-HB100V18 G-HB-150V18 G-HB-200V18	60° 90° 120°	X= Occupancy/Dimming *Includes motion sensor *By-level dimming * 1 handheld programmer	5K= 5000K * Special lead times & cost may vary
